

IFFD ITSAR 3B

(Idaho Technical Search Rescue and Collapse)

Presented By IFFD Technicians

How we were formed

- IDAHO BUREAU OF HOMELAND SECURITY
- As part of the state strategy, the Idaho Bureau of Homeland Security has identified the need to enhance the Technical Rescue Teams in the North, South and East of the state. These regions pose the largest risk for urban disaster-related incidents. Your participation in the effort to resolve this life-threatening response deficiency is greatly appreciated.
- **Goal:**
 - To enhance existing regional Technical Rescue capabilities for Regions One, Two, and Three.
 -
- **Objectives:**
 - Establish a regional National Incident Management System (NIMS) compliant Technical Rescue task force capable of long-term and self-contained operations. Regions One, Two, and Three will each have a task force. This consists of Boise, Coeur d'Alene, Pocatello and Idaho Falls Fire Departments.
 - Develop NIMS compliant Technical Rescue Teams (TRTs) which shall be strategically placed throughout each region. These TRTs will be capable of initial and short-term sustained actions at an urban disaster and will be available to support the Urban Search and Rescue Task Force operations.

Our 1st due Counties

- Bannock
- Bear Lake
- Bingham
- Bonneville
- Butte
- Caribou
- Cassia
- Clark
- Franklin
- Freemont

Structural Collapse – Awareness

Trench Rescue - Awareness

Specialty Training

IFFD Technical Rescue Team

We consist of 26 member team working full time at the IFFD as well as putting in extra hours of training for the team expectations.

The team has 5 areas of focus and carry various other benefits with them including experienced EMT and Paramedic personnel, Regional Hazmat response members and Swift water Rescue members.

- High angle Rope Rescue
- Confined Space Rescue
- Trench Rescue
- Building Collapse and Rescue
- Heavy Extrication

How does this benefit you and the community

An advanced level of assistance

- When responding to other communities we have the capability to support and work inside of the incident command that is established with the AHJ.
- With our advanced training comes specialized equipment and personnel trained in the use and operations under these unusual and challenging situations
- We have contact capabilities and have trained and worked with the other special rescue teams throughout the state for additional support depending on the situation at hand.

24/7 support on request

- We are a 26 member team that has capabilities of being self sufficient for up to 72 hours.
- Deployable at anytime
- Technicians available for consultation
- Training capabilities for operation levels that may be needed inside your communities or companies
